

Lunchbox Parents Guidelines

Every second and forth Thursday day will be Lunchbox Day in Shooting Stars Room. The purpose behind this routine is to familiarise the children with this process in preparation for Primary School, and also support parents to be well-prepared in supporting Tamariki.

You will see the reminder everywhere before the day, at the reception desk, on our door and also community post in Storypark. We also attached the annual planning calendar on the back

On this day, we ask that you please provide your child with:

- A **named lunchbox** that has enough food for them to eat at **morning tea, lunch and afternoon tea time**.
- We remind you that we are a **“Nut Free”** centre, so please do not bring in any products contains nuts.
- To limit the choking risks, **please cut grapes into half or quarter , slice apples or off the skin, or chop out any tough fibres. More details on the back.**
- We also politely remind you to please **not pack any high sugar foods or other types of food that does not align with our centre healthy eating habits.**

We suggest if your packing any package food for your child, please ensure they are able to open it themselves (maybe make a small cut with a pair of scissors can be very helpful).

Shooting Stars Team

High risk foods which will be excluded from our service:

Nuts

Large seeds such as pumpkin or sunflower

Hard or chewy lollies

Chips and corn chips

Rice crackers

Dried fruit such as apricots or raisins

Sausages, saveloys and cheerios

Popcorn

Marshmallows

Jelly: e.g. , round, cup-shaped or contains konjac.

Fruits and Vegetables

Fruits and vegetables are fantastic sources of vitamins and minerals that keep your child's body healthy. They're also a good source of fibre, too. Try to provide two sources of these foods in your child's lunch, including items such as:

- fresh, frozen or dried fruit such as apples, strawberries or oranges
- tinned fruits like pineapple or peach slices in juice (taken out of the tin)
- cut vegetables like cucumber, bell peppers and carrot

Starchy Carbohydrates

Foods containing calcium (like dairy products) can help to boost your child's bone growth, while protein-rich foods can help with muscle strength - that's why these foods are in the 'Tall and Strong' group! You should aim for one portion of these foods, which could include:

- bread
- potatoes, sweet potatoes and other starchy root vegetables
- pasta and noodles
- rice and other grains
- breakfast cereals

Dairy or Dairy Alternatives

Foods containing calcium (like dairy products) can help to boost your child's bone growth, while protein-rich foods can help with muscle strength. You should aim for one portion of these foods, which could include:

- milk
- cheese
- yoghurt
- fromage frais
- oat or soya milk

Proteins

Protein is vital for your child due to its role in rapid growth and development. It helps build muscles and tissues, supports a strong immune system and aids in brain development. Add protein to your child's lunch by including your protein choice in a sandwich, wrap or salad. You could include:

- beans and pulses
- meat and poultry
- fish
- eggs
- meat alternatives

Many schools are 'nut-free' so it's a good idea to avoid adding nuts to your child's lunch, just to be safe.

Eat in Moderation

Everyone likes a sweet treat or snack and a balanced diet means having something from every food group. A small treat once in a while does not mean you have an unhealthy diet.

Here are some tips about these foods:

- Avoid cereals that are high in sugar, like those that are sugar-coated or chocolate-flavoured.
- Limit flavoured dried rice, pasta and noodle products, such as instant flavoured noodles, pasta and rice in packets and pots.
- Limit your child's consumption of items like chips, fried rice and fried noodles to no more than once a week.
- Avoid fruit tinned in syrup – opt for fruit tinned in juice instead.
- Limit foods high in saturated fat, salt, and/or sugars like cakes, sweet and savoury pastries, biscuits, crisps, chocolate and other confectionery.
- Limit foods containing artificial sweeteners as they may encourage children to prefer very sweet foods.

Talk to your child's school about any other recommendations they have or whether any other foods need to be avoided due to allergies of other pupils.
